

ACTUAL SITUATION

THERE IS A CHANCE OF RAIN
...MAYBE!?

We only have...

- chance of rain in % and direction
(by close airport, weather-station & radar)

- »live« from pits
- driver's »live-info« via radio

ADVANTAGES

DON'T BE A MAYBE!

- lifetime multi-monitoring of precipitation and its changes
- early-warning of precipitation
- all sectors

- as many areas as needed
- working and power supply autonomously
- own radio frequency spectrum
- one-man-operation to install system

HARD FACTS

- patented system
- supply sensor 9V DC
- supply repeater/receiver 9-30V DC
- frequency 868 MHz/25mW sensor; EU-conform
- frequency 869 MHz/500mW repeater; EU-conform
- distance to be covered: sensor max. 3.5 kilometers
- distance to be covered: repeater max. 15.0 kilometers
- basic software to run system
